Period: 2010

Value: £120K

Location: Sale

Works: Deck Waterproofing and Coloured Wearing Course, Structural Movement Joints and Lining

The Project

SL Construction Services has successfully completed a Retail Car Park roof system for Aldi on a new retail development in Sale Manchester. A combined Waterproofing and Wearing course system was successfully installed to both the upper and intermediate decks of the Car Park. Aldi selected the a Fully Reinforced system for its durability and reliability for zero maintenance requirements in service.

SL Construction Services provided an in house team of installation experts and management to oversee every stage of the installation ensuring the highest quality standards were met at all times.

Essential to Aldi was speed of installation and the rapid curing fully reinforced system provided the perfect solution to guarantee the project would open on time.

SL Construction Services continues to expand its retail service offer to major retail clients. It is able to offer a national service across all major retailers' assets to include roofing and cladding projects.
