

**Client:** Network Rail/Vinci  
**Name:** Nottingham MSCP  
**Period:** Feb 2012  
**Value:** £260k  
**Location:** Nottingham  
**Works:** Deck Waterproofing and Coloured Wearing Course, Structural Movement Joints and Lining

## The Project

**SL Construction Services** were selected by Network Rail through early Contractor involvement to complete the installation of a protective waterproofing and anti skid system to the new **Nottingham Rail Station Multi story Car Park**.

The new build project is part of the major redevelopment of the Station.

In addition the colours required by **Network rail** were batched specific for the project.

The project has been successfully installed to include preparation of the concrete through enclosed blasting

All lining was also completed in a single one stop shop package.

## The Works

**SL Construction Service's** Early involvement allowed **Vinci** and **Network Rail** to stipulate the required performance of the waterproofing and anti-skid system to include the system's physical installed qualities as well as the installation requirements of installing a system through the winter months required to satisfy the construction programme.

Co-ordination of works were planned around other trades with good on site management and a direct skilled workforce from **SL Construction Services** providing flexible and assured safety and quality at every stage of the project.

The project has been completed ahead of time and on budget.
