

Client: Wates Construction
Name: Redrock Leisure and Retail
Period: **May 2017**
Value: £140k
Location: Stockport
Works: Deck Waterproofing and Coloured Wearing Course, Structural Movement Joints and Lining

The Project

SL Construction Services were selected by **Wates Construction** to install a protective waterproofing and anti-skid system to the new car park at **Stockport, Cheshire**.

The Reinforced system has been installed for **3461m²** and Movement Joints.

The Works

Early Contractor involvement allowed the design team, **Wates Construction** and **SL Construction Services** to agree details, value engineer solutions and manage all building interfaces.

The project has been successfully installed to include preparation of the concrete through enclosed blasting.

The last operation was to apply all white lining to the new **Deck Waterproofing System**.

Early involvement meant works were phased and planned to ensure the system was not damaged as construction work progressed ahead of programme.

All works were planned to strict environmental and safety guidelines prior to commencement.

Completion

Co-ordination of works were planned around other trades with good on site management and a direct skilled workforce from **SL Construction Services** providing flexible and assured safety and quality at every stage of the project.

The project has been completed ahead of time and on budget.
