

Client: Vinci Construction UK Limited
Name: Shannons Mill MSCP / Asda
Period: **November 2012**
Value: £205K
Location: Birmingham
Works: Deck Waterproofing and Coloured Wearing Course and Lining

The Project

SL Construction Services were selected by **Vinci Construction UK Limited** to install a protective waterproofing and anti-skid system to the new car park at **Shannons Mill, Birmingham**.

SL Construction Services removed **152 LM** of **Expansion Joint Seal**, repaired the Joint Aris and reinstated a secondary seal below the new seal.

The last operation was to apply all white lining to the new **Deck Waterproofing system**.

The Works

The top of the existing system was planned off, making sure not to touch the concrete surface itself, following this they Fine Milled to remove any last remnants of the existing system.

The whole deck was grit-blasted to leave bright clean concrete to lay the Deck Waterproofing and Anti-Skid system.

In total 20T of debris was removed, the Store was open during the works, but with good coordination this was done with no complaints from the public.

Co-ordination of works were planned around other trades with good on site management and a direct skilled workforce from **SL Construction Services** providing flexible and assured safety and quality at every stage of the project.

The project has been completed ahead of time and on budget.
